Education

GGSIU <i>Bachelor of Technology in Computer Science and Engineering (Expected 2026)</i>	CGPA: 8.2 Delhi, New Delhi
Saint Giri School <i>CBSE Class 12 (2021)</i>	Percentage: 82% Delhi, New Delhi

Experience

FoundIt (formerly Monster.com) <i>Frontend Developer Intern (Next.js)</i>	Jul 2024 – Oct 2024 Noida, UP
<ul style="list-style-type: none">Enhanced frontend design through responsive techniques with Tailwind CSS and a modular component approach, allowing for efficient UI management and development.Implemented profile page features (forms, modals) with React Hook Form and custom hooks, cutting data-fetch errors by 20% through API integration.	
Enactus VIPS <i>Member</i>	Jan 2023 – Sep 2023 Delhi, New Delhi
<ul style="list-style-type: none">Developed billing & inventory software, reducing processing time by 40% and supporting 200+ monthly transactions.Enhanced project management, teamwork, and communication skills while contributing to social and environmental initiatives.	

Projects

BillWise | Python, Django, PostgreSQL, Next.js

- Engineered **DRF (Django REST Framework) backend** with JWT auth and **validation using serializers**, implementing **scalable** billing, inventory, and analytics APIs.
- Built a **modular and extensible** frontend in Next.js, accelerating feature rollout by 25%, with **clean code architecture**, designed to support future features like advanced analytics and AI integration.
- [GitHub link.](#)

REST APIs | Node.js, Express, Django, Spring Boot

- Designed and developed **production-ready RESTful APIs** using Node.js and Django, implementing JWT-based authentication, **schema validation** with Zod and Django REST Framework serializers, and following best practices in backend architecture.
- [GitHub link.](#)

Appointment Booking Application | Flutter, Dart

- A basic Flutter application for appointment booking, my first Android/iOS application
- [GitHub link.](#)

Note-Taking across platforms | Flutter, Dart, Firebase, Firestore

- An aesthetic Android application for note taking (A Keep Notes clone, but aesthetically pleasing).
- [GitHub link.](#)

Skills

Programming Languages: Java, JavaScript, C++, C, Python, Dart, SQL
Frameworks and Tools: React, Next.js, Flutter, Django, Flask, Firebase, Tailwind CSS, Supabase, Node.js
Databases: PostgreSQL, MySQL
Version Control: Git, GitHub, GitLab
Other Tools: Figma, REST APIs
